Beef, Veal & Lamb

Beef output last week increased 6.5% and was 6.7% larger than the same week in 2016. The cattle herd continues to expand as of January 1st, up .7% from the prior year and the biggest since 2009. There were mixed signals about sustained herd growth with beef cows up 1.6%, but replacement heifers were down 3.7%, the first annual decline in seven years. Still, solid year-over-year gains in beef production are expected to persist in the coming months. Spot beef shipments last week were the smallest for any non-holiday week since May. Yet, forward sales of grinds were the best since early December. Strong retail feature activity this spring is expected to underpin ground beef prices.

Description	Market Trend	Supplies	Price vs. Last Year
Live Cattle (Steer)	Decreasing	Short	Higher

MARKET TRENDS

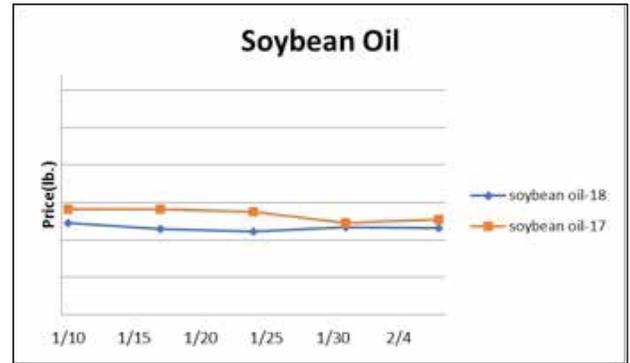

FEBRUARY 16, 2018

Grains

During December, the U.S. produced 3.4% more soybean oil than the previous year. December domestic soybean oil stocks were 5.5% larger than last year. These factors, along with tempered biodiesel use, have weighed on soybean oil prices as of late. But better demand could lift soybean oil prices in the coming months.

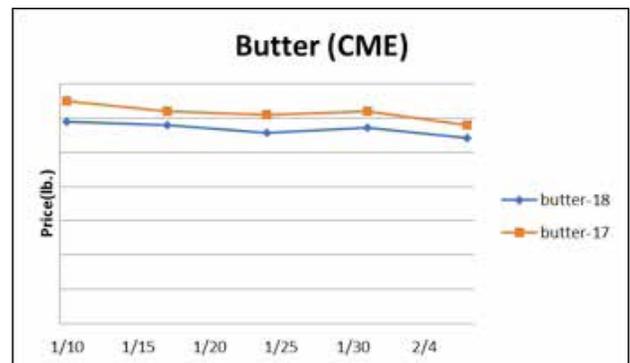

Description	Market Trend	Supplies	Price vs. Last Year
Soybeans, bushel	Decreasing	Good	Lower
Crude Soybean Oil, lb	Decreasing	Good	Lower
Soybean Meal, ton	Decreasing	Good	Lower
Corn, bushel	Increasing	Good	Lower

Black Beans, lb	Steady	Good	Lower
Rice, Long Grain, lb	Increasing	Good	Higher

Dairy

The dairy markets have mostly found support during the last week. Drought conditions in New Zealand continue to limit milk production and exports there. There are signs that European milk production growth may be beginning to slow as well. However, nonfat dry milk stocks, a key data point for international dairy prices, as of December 31st in the U.S. were up 47% from 2016 and a record. This suggests the upside may be limited in several key domestic dairy markets in the coming months, including cheese. The CME butter market is expected to find support relatively soon. But, the upside price risk in butter is likely only modest during this winter.

Description	Market Trend	Supplies	Price vs. Last Year

Class IV Milk (CME)	Increasing	Good	Lower

MARKET TRENDS

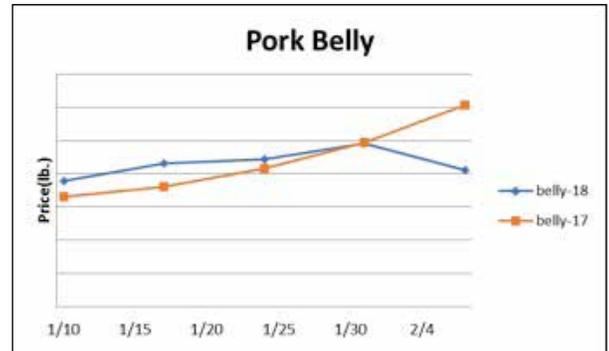

FEBRUARY 16, 2018

Pork

Pork production rose 3% last week and was 5.6% larger than a year ago. Pork output will seasonally decline this spring, but this year's reduction may be limited by plentiful hogs. The USDA is forecasting Q2 pork production to be 4.9% better than last year. This should temper the typical seasonal gains for the pork markets. Pork belly prices are beginning to weaken. Since 2013, the average move for the pork belly primal over the next four weeks is down 6.8%.

Description	Market Trend	Supplies	Price vs. Last Year
Live Hogs	Increasing	Ample	Higher

Poultry

For the week ending January 27th, chicken output was up 12.8% from the prior week and was 2.1% more than last year. The six-week moving average for chick placements was 1.7% bigger than last year which signals that modest chicken production gains will occur in the near-term. The ARA Chicken Wing Index last week was the second lowest for the date in seven years. Wing prices usually peak the week prior to the Super Bowl. Further chicken wing price declines may be upcoming. The ARA Chicken Wing Index usually drops 13.5% from now until bottoming in early May. Chicken tender prices are firming. The five-year average move for the ARA Chicken Tender Index during the next 15 weeks is an increase of 30.3%.

Seafood

Retail seafood prices have been on the rise during the last few months and have mostly tracked above the previous year levels. This compares to other proteins, including beef, where retail prices have mostly averaged at levels not seen for this time of the year in a few years. If this trend continues it could temper seafood demand and wholesale prices.

Description	Market Trend	Supplies	Price vs. Last Year

Various Markets

The canned tomato markets remain fairly steady. The tomato for processing supply is modestly tighter than the previous year but is still large. Prices may remain above 2017 but the historically big supply should temper the upside in the canned tomato markets for the next several weeks.

Description	Market Trend	Supplies	Price vs. Last Year

MARKET TRENDS

FEBRUARY 16, 2018

PERFORMANCE
FOODSERVICE

Produce

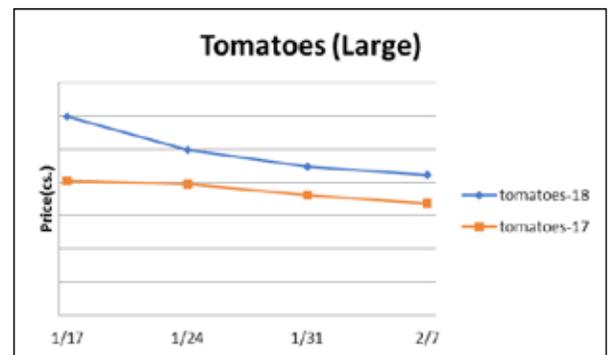

The tomato markets remain at relatively engaging levels for buyers as supplies have almost recovered from last year's hurricane. Tomato shipments from Florida last week rose 14% from the previous week and were just 7% less than the same week last year. History suggests that the downside price risk in tomatoes from here is likely only modest. Idaho potato prices have been steady to soft during the last week. However, potato stocks from last fall's harvest are below last year, and higher potato prices are likely in the coming months. Lettuce, romaine and leaf items are steady and quality is good. Lemons and oranges are in a very EXTREME market. Strawberry and raspberry supplies are good with favorable, steady prices and quality.

Watch List

Pineapples: Several weeks of cooler temperatures have impacted the growing areas in Guatemala and Mexico. In addition, we have seen major flooding in Costa Rica which has not only caused major flooding and delayed harvesting, but has also affected infrastructure that has delayed shipments. Our growers are seeing lower yields, quality, and volumes. We will be watching day to day as shortages can come along any time.

MARKET ALERT

- Bananas – ESCALATED
- Lemons – EXTREME
- Limes – ESCALATED
- Mushrooms – ESCALATED
- Oranges – EXTREME

MARKET TRENDS

FEBRUARY 16, 2018

PERFORMANCE
FOODSERVICE

Produce

Apples & Pears

Prices are unchanged. Storage supplies are readily available. Peak sizes include: Fuji (88- to 100-count), Gala (100- to 133-count), Golden Delicious (100- to 113-count), Granny Smith (113- to 138-count), and Red Delicious (80- to 113-count). Quality is very good: sugar levels range from 14 to 18 Brix. Pear prices are climbing. The Washington Bartlett pear season has ended. The new crop California Bartlett season will begin in late June.

Artichokes

Steady market with higher prices. Quality is good.

Arugula

Product is available and quality is good.

Asparagus

Supplies are good and prices have improved. Quality is good.

Avocados

Overall volume should remain consistent and smaller sized fruit supplies have improved as well. As we see production ramping up out of California, this will only add to the stable volume crossing from Mexico. Markets are expected to remain stable through the second week February. Promotional volume is still available on #2 fruit.

Bananas

ESCALATED - Demand on this item remains firm, and as we've recently noted, quality is going to be inconsistent and supplies could be interrupted from the major weather issues that impacted the growing regions in Guatemala, Mexico and Costa Rica. This only further complicates an already short banana market across the country due to virus impacts. We expect fruit to be greener than average for the next several weeks until inventories re-balance with riper fruit becoming available. We ask for your patience and understanding during this time as fruit will certainly be greener and might need to be stored on site to further ripen.

Beans

East: Finally we are seeing a weakening market as more and more supply come to light. Quality is great as more growers jump on board.

West: Good volume is still available for the next 10-14 days. Prices are cheap and quality is excellent.

Berries:

Blueberries

Availability is good, quality is fair.

Blackberries

Volume is good, quality has improved.

Raspberries

Volume has improved and quality is good.

Strawberries

The market is good, we are seeing steady prices and quality is good to fair.

Bok Choy

Quality is average and we are seeing some higher quotes on WGA cartons.

Broccoli / Broccoli Florets

Supplies are good, quality is very good, and the market is down.

Brussels Sprouts

Supplies are good and prices are down. Quality is good.

Cantaloupe

We are seeing decent volumes of offshore fruit arriving on both coasts., with fair demand fruit is on the large side mostly 9's and very few 12's and 15's. The overall quality of the offshore fruit looks good with a green to cream cast and very good internal color and descent sugars. We will be in the offshore fruit through April until we start back in the desert around the first of May.

MARKET TRENDS

FEBRUARY 16, 2018

PERFORMANCE
FOODSERVICE

Produce *(continued)*

Carrots

We are seeing both good quality and volume.

Cauliflower

Supplies are great and quality is excellent with a wide range of pricing.

Celery

This market is fair. Due to the recent rains, we are seeing product breakdown quickly creating some quality issues.

Cilantro

Supplies are good and quality is improving.

Corn

Sweet corn markets are down this week due to lower demand out of South Florida; we are seeing moderate crossing through Nogales. Quality is good.

Cucumbers

East: A nice flush of Honduran supply is putting downward pressure on super and select grade FOBs. Cartons are still a little tight. Quality has been up and down as the fields have experienced some weather related issues. Fruit is showing signs of scarring and early onset decay. We recommend keeping a tighter than usual inventory.

West: Great supply is filtering into the market place driving FOBs down quite a bit. Quality is much better than what the east is reporting.

English Cucumber

There are excellent supplies crossing through Nogales and McAllen.

Eggplant

East: Better growing conditions are finally helping FOBs ease off a bit and decent supply in the marketplace. Some quality issues are seen in older fields, but this should not last long as growers move into new crops soon.

West: Low prices and good supply from MX. Quality reports are great as well.

Fennel

Supplies for the week will be good and quality is good.

Garlic

EXTREME - We are about 50% done with the 2017 crop. Supplies will remain tight between now and July. Prices remain high.

Ginger

Chinese ginger markets are mixed, but quality is good. Also, product is available at higher costs from Brazil, Costa Rica and Honduras and Peru with no major quality issues being reported.

Grapes

There is good volumes of Peruvian arriving on the east coast and good volumes arriving from Chile on both coasts. The Chilean and Peruvian fruit quality is very nice, which is a big change from last year. We are hoping that the imports this year will continue with excellent quality barring any major weather issues. The Chilean crop is of normal volumes and the weather has been good, so we are expecting a good year.

Green Cabbage

Supplies have tightened and markets have firmed on both coasts, but quality remains good.

Red Cabbage

Quality and sizing have been great with good color. The market is firming.

Green Onions

Prices have come down; quality has improved.

Honeydew

We are seeing some off shore and Mexico fruit here on the west and good volumes on the east as well. The Mexico volumes will be very light until around April, and will be dependent on offshore through April. The first fruit is a bit

MARKET TRENDS

FEBRUARY 16, 2018

PERFORMANCE
FOODSERVICE

Produce (continued)

green but cuts nice and sugars are descent, We will start to see better volumes in the next few weeks, but right now fruit is on the tighter side especially on the 6's and 8's fruit is mostly 5' and 4's. We will also be dependent on the offshore fruit through April, until we start back in the California desert the first of May.

Jicama

Prices are firming up and inventories are lighter. We are seeing some quality and shelf life issues in storage product.

Kale (Green)

Quality is improving. Supplies are good.

Kiwi

California crops are now in full swing with ample supply available and showing excellent quality. This new crop will extend all the way through to February. We are now seeing Italian fruit available as well on the east coast. Market remains steady.

Lemons

Market strong with good demand and good movement across the board. We are done harvesting in Dist 3 (desert) and going in a good way here in dist 1 (Central Valley), we are gassing fruit so you will see some checkerboard color and some spotting , just like the oranges we will hope to see better color break here in Dist. 1 as our nighttime temperatures have been cool. There has been some clear rot showing up which is caused by the warmer days and moisture in the ground due to the rains and the morning fog. The overall crop size out of dist 3 is about 20% lighter than last year and here in Dist. 1 about 15% lighter. We expect the market to stay fairly strong with lighter volumes out of both districts and with domestic and export demand very good.

Lettuce:

Butter

Prices are stable. Quality is good.

Green and Red Leaf

Quality is good. Prices are good.

Iceberg Lettuce

Quality is nice and the market is low. Demand is lighter than normal.

Romaine

At this point, supplies exceed demand. Quality is good.

Romaine Hearts

Supplies are normal and quality is good.

Limes

ESCALATED - This market is active and will continue to rise. Typically this time of year we start seeing the market tightening up and pricing climb. Much colder weather and rain has also contributed to seasonality this year. Expect supplies to get tighter through April.

Napa

Supplies are steady and quality is good in the west. Supplies in the east are tighter due to the cooler weather that has hit the growing regions in North Florida and South Georgia this month.

Onions

We saw a little downward movement on jumbos and medium yellows. The opportunity here would be for receives able to buy volume on either of these sizes. Reds, Whites, Super Colossal and colossal yellows did not change.

Oranges

Market is very strong with excellent demand across the board the 113's and 138's are demand exceeds supply. We are in full swing on our California navels and the overall quality is looking good with sugars are still around 12-15 and acid levels are minimal, so fruit is eating excellent. We are forecasted for warm dry weather for the next few weeks which is going to cause fruit drop. We are already seeing fruit drop in some of the weaker orchards and it is only going to get worse. Along with fruit drop we will see fruit that will start to puff and crease and could start to see internal separation which is extremely early for us. The 88's and smaller are extremely limited and will continue to be a struggle through the season as we are peaking on 56's and 72's now. The overall crop is about 15-20% lighter than normal, therefore smaller fruit will continue to stay very tight going forward. Most blocks right now are peaking on 72's followed by 56's.

MARKET TRENDS

FEBRUARY 16, 2018

PERFORMANCE
FOODSERVICE

Produce (continued)

Parsley

(Curly, Italian) Quality is improving and supplies are good.

Green Bell Pepper

East: Some slight improvement in supply, but not enough to change FOBs. Supply is mostly light, but steady. Harvests are leaning towards larger size pepper more readily available with choice still snug. Quality is mostly good, but there are some reports from the fields scarring and bruising due to prior weather events.

West: Good steady supply is coming from MX (Sinaloa & Sonora). There is good availability on all sizes. FOBs are stable for next week. Quality is mostly good; however, older fields are showing signs of thinner walls.

Jalapeño Pepper

East: Still very limited supply from FL. Prices are fairly steady. Quality, however, is good if you can find them.

West: Although production eased off a tad, promotable supplies are still available from Sonora & Sinaloa. Prices have firmed up and quality reports are excellent.

Red & Yellow Bell Pepper:

Red Bell Pepper

Supplies are now shipping primarily through Nogales and markets are down. Quality is outstanding.

Yellow Pepper

Supplies are unchanged loading through Nogales. FOB prices are mostly unchanged as well.

Pineapple

Demand remains firm; quality is going to be inconsistent and supplies could be interrupted as major weather issues have impacted the growing regions in Guatemala, Mexico and Costa Rica.

Idaho Potatoes

The market is weaker this week across the board. Shippers are trying to maintain the market on the middle sizes 60 thru 80ct. Most sheds are anxious to move 6zo, 100ct, 90ct and to a lesser degree 40ct, with inventory on the floor.

Radishes

Quality is good and supply is slowing down. Expect to see stronger markets through the summer.

Salads & Blends

The market is stable; iceberg and romaine stocks are plentiful. Quality is good: Inspectors are monitoring core material/seeder and internal burn in order to pack the best-quality product available in the industry.

Snow and Sugar Snap Peas

Snow and sugar snap peas supplies are improving through Miami.

Spinach (Bunched)

Supplies are available and quality has improved.

Spinach (Baby)

Baby and clipped spinach supplies are good. We are seeing improvement in quality.

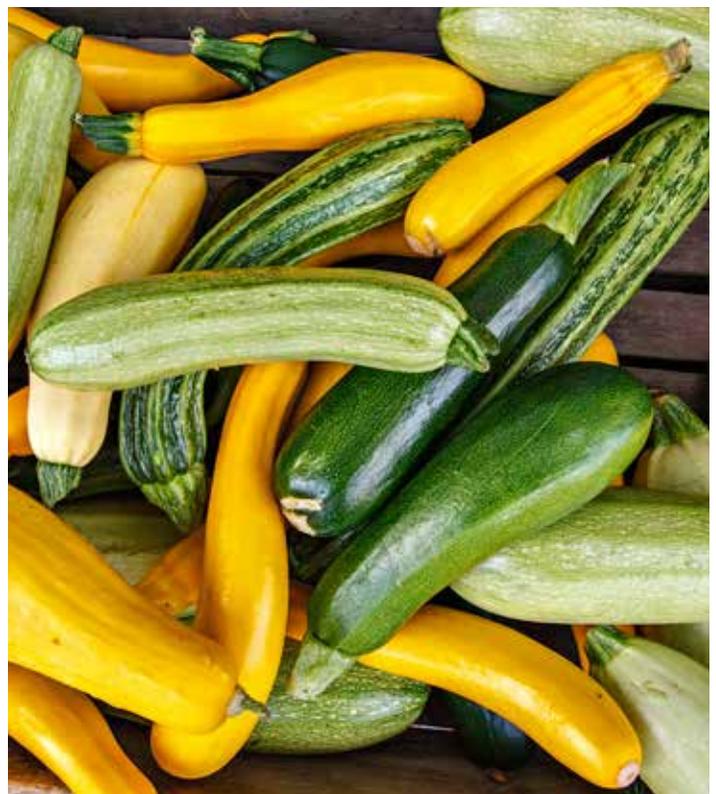

Spring Mix

Supplies and quality are good.

Yellow Squash / Zucchini

East: Supply is light, but steady. Demand remains somewhat light as well which is helping maintain a steady FOB market. The struggle and biggest question at hand is quality, especially yellow. Quality is still in poor condition. New fields are expected to start in about 10 days which will hopefully improve overall quality on both green and yellow squash.

West: Decent supply is available as farmers enjoy good growing conditions. FOBs are up a few dollars mostly due to mixed quality concerns. Quality is rough in the west as well, but not quite as bad as the east. As growers soon move into new fields, quality is expected to improve.

MARKET TRENDS

FEBRUARY 16, 2018

PERFORMANCE
FOODSERVICE

Produce *(continued)*

Tomatoes

East

Rounds

Our Florida crop is producing solid numbers with sizing geared heavier towards the 5x6 size. Small fruit is just a bit snug. We will see a slight decline in volume over the next 3-4 weeks as post cold snap crops are dug into. However, this is nothing to be alarmed about at this time (Hurricane Irma round II is not going to happen!). Pricing from the east will weigh heavily on supply from the west. As long as MX continues to push strong volume into the marketplace, expect Florida pricing to remain low. FOBs for next week are up across the board due to the slight volume decline. Quality from older fields is seeing a bit of trouble, however, quality from newer fields is beautiful.

Romas

Supply is steady but a bit on the light side. This is completely normal for this time of year. Growers expect smooth and consistent numbers through February barring any major weather events. FOBs push upward on all sizes due to the lighter supplies. Quality is excellent.

Grapes

Our Florida farms are pushing great numbers from the fields. Some growers are projecting a slight dip in yield towards the end of the week's harvest, however, still plenty of fruit available to maintain demand. FOBs are steady for next week. Quality is excellent.

Cherries

Supply has leveled out with steady demand. FOBs are stagnant with excellent quality available for purchase.

West/Mexico

Rounds

Western Mexico crops are at peak production levels and expected to remain plentiful through February. With a weak National Market, growers are pushing great supply across the borders. Customers have plenty of options of sizing and color at their fingertips. FOBs linger at the minimum on all sizes and quality is excellent.

Romas

Great volume is coming from Western Mexico as growers are in peak production. FOBs are trading at or around the minimum suspension agreement with excellent quality and sizing options available.

Grapes

Farms suspect excellent supply through February with product crossing through Nogales. FOBs are trading at or close to the minimum suspension agreement with excellent quality.

Cherries

Similar to all other tomatoes, superb growing conditions are keeping supply plentiful. Balanced with a healthy demand, FOBs remain low with excellent quality.

Watermelons

The market is steady; stocks are adequate. Quality is good: slight issues include odd shape, thick green/white rinds, and under-ripeness. Sugar levels range from 11 to 12 Brix.
